Unvented Accessories

SPACK ALK/04:

Kit Includes: Expansion vessel, pressure reducer / strainer and non-return valve.

SPACK ALK/05:

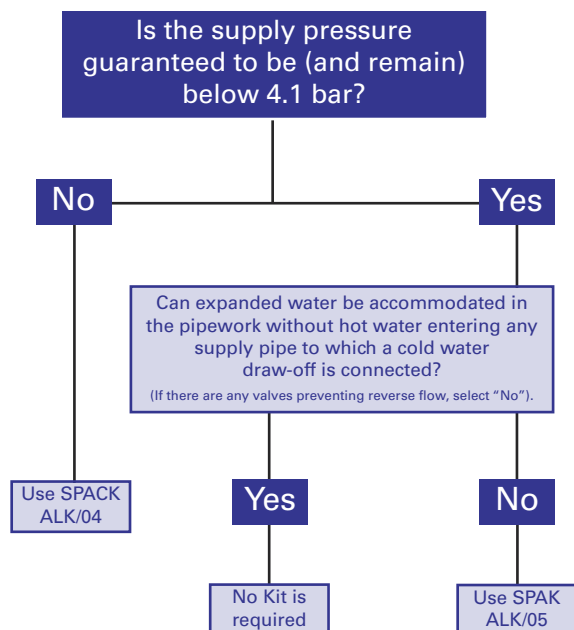

Kit Includes: Expansion vessel and non-return valve.

SPACK ALK/06:

Kit Includes: Pressure and temperature relief valve.
Note: SPACK ALK/06 should be used in any installation where a pressure and temperature relief valve is required to provide enhanced levels of safety.

SPACK ALK/03:

Kit Includes: In-line thermostatic blending valve that can be used with any Sector unvented water heater. It can be fitted in any position - vertical, horizontal or upside down and will failsafe in the event of a cold water supply failure (closing off the hot water supply). Once the temperature has been set on the valve, it can be easily and securely locked in position.

Description	Part No.
