CPD Courses

Itho Ventilation Limited

Itho Ventilation Limited is offering three companion CPD courses to help you to gain a valuable insight into the importance of energy efficient ventilation.

Since the introduction of a mandatory rating against the Code for Sustainable Homes back in May 2008, the movement towards building zero carbon homes is well under way. With a total of six levels to aspire to, the social sector experience the tightest regulations and must already adhere to Level 3 or above in its publically funded new build properties, with plans for this to progress to Level 4 by 2010.

CPD - Energy Efficient Ventilation and the Future of Ventilation Systems

In the search for continued CO₂ savings, dwellings are becoming increasingly more airtight making the need for continuous mechanical ventilation a must. Covering the growing need for energy efficient ventilation systems, how these are being developed, up-to-date industry news and a look at future requirements, this course is relevant to anyone involved in the planning, design, construction and marketing of new homes as well as for those renovating older dwellings to a high standard of permeability.

CPD - Duct it Right

The Importance of Quality Installation to the Performance of the Modern Ventilation System

Covering the all important subject of the correct positioning of the units plus how the terminations and ducting of a ventilation system need to be installed to achieve the maximum energy efficiency, this course will cover the different ventilation strategies available and how they work, the importance of installation practice versus system performance, the critical elements that ensure maximum system performance, installation guidance, planning, design and commissioning.

CPD – Design Considerations

Drawing on best practice in ventilation systems planning

Ventilation systems are now an integral part of living, eco designs and must be thought about at the very first stage of design. Unit location, ducting routes and the correct placement of terminations - all need to be given careful consideration before the build begins.

Available either in-house or at our Head Office in Burton on Trent, these CPD courses can be run morning, lunchtime or afternoon (your choice) and include refreshments.

Full Day Training Module

Our UK Head Office in Burton on Trent has a fully equipped training facility and often runs industry relevant courses for all levels of the supply chain from the Architects and Consultants through to the Installer, Site Agent and Building Control.

The Training Module includes the following:

- An introduction to the Itho Ventilation Group
- Building Regulations and the Code for Sustainable Homes
- Energy Efficient Ventilation and the Future of Ventilation Systems (CPD)
- Design considerations. (CPD)
- Duct it right (CPD)
- Written tests
- Issue of CPD certificates

These full day courses include refreshments and a buffet lunch.

FREE WIFI available to all visitors.

For further information about CPD courses or full day training sessions, contact info@itho.co.uk or call 0870 460 6741
