

Senate Systems is a division within Senate Electrical originally formed in 1992 to offer our customers, *Free Of Charge, a local good quality technical support resource within specialist product areas.**

We recognise the changes in our market today and the increasing pressure placed on electrical contractors to offer a design and build service. SYSTEMS is for you !

A quality service unparalleled in its technical expertise, knowledge and flexibility, complimented with quality products from the Worlds leading manufacturers.

Our SYSTEMS engineers can prepare designs from an existing brief or alternatively design a project from scratch.

SYSTEMS engineers regularly converse with architects, electrical consultants and building services engineers.

Designing to CIBSE recommendations and relevant British and European standards our SYSTEMS engineers offer free site surveys and will prepare drawings for Building Control and Local Authority Approval.

SYSTEMS today consists of a team of experienced engineers and designers working alongside our branch network in partnership with a selected number of key manufacturer's.

A FREE* Lighting Design Service utilising "RELUX" a 3D Computer Aided Lighting Design Software package producing detailed drawings and rendered 3D Project Proposals.

With advice and technical support only a phone call away, lighting, energy management, fire, security and CCTV installation for the electrical contractor has never been easier!
